Plesk licenses, editions and standard features

Plesk uses a simple, flexible license model with loads of options:

- 1) Server-based licenses – example: Plesk licenses
 - a. Installation on **dedicated servers** (also known as physical servers)
 - b. Installation on **virtual servers** (also known as virtual private servers or VPS)
- 2) You can buy all our licenses on a monthly/annual basis - or in discounted bundles. You can end this license at any time and it renews automatically through our licensing servers.

3) All **three editions** of our server-based licenses present a number of core features:

a. Plesk Web Admin Edition

For Web & IT Admins who manage sites for an employer, business, or themselves.

If you need simple site and domain management without the service provider overheads, like managing customers, resellers or subscriptions - then this is the perfect choice.

b. Plesk Web Pro Edition

For Web Professionals who design, develop, and deploy sites and web apps.

You need a simple way to manage your customers' sites and apps, including use of WordPress as a CMS platform in a fully-managed model for your customers.

c. Plesk Web Host Edition

For Agencies or Web Hosters with all the hosting features you need.

You can allow your customers to use your shared accounts in almost any configuration you want. And you can secure WordPress and domain management tools too. This edition also offers advanced reseller management.

Here's a full breakdown of each edition's available features:

Web Admin Edition	Web Pro Edition	Web Host Edition
Plesk Core Features		
10 domains	30 domains	Unlimited domains Reseller management
	Subscriptions, Customers and Account Management	Subscriptions, Customers and Account Management
	WordPress Toolkit	WordPress Toolkit

Plesk Security Features		
Plesk Security Core + Basic Atomicorp Rules Web Application Firewall + Support for many 3rd party web application firewalls		
Firewall + Fail2ban intrusion detection		
	DNSSEC Support	DNSSEC Support
SpamAssassin		
Outbound Antispam		
Other Features		
	Developer Pack: PostgreSQL, MSSQL, and Tomcat	Developer Pack: PostgreSQL, MSSQL, and Tomcat
One Language Pack included, but with additional language packs as options too		
Mobile Manager App		

Plesk Onyx – Special Editions (2018)

Each is a bundle of useful extensions packed in one Plesk Edition with a specific offering.

- **Plesk WordPress Edition** - for WordPress Users and Agencies
- **Plesk Business & Collaboration Edition** - for SMB Owners and IT Admins

Plesk WordPress Edition	Plesk Business & Collaboration Edition
This bundles includes the Plesk Web Host Edition combined with extensions specifically-designed to support your WordPress work.	This bundles includes the Plesk Web Host Edition and necessary extensions and tools for all your business and communication needs.
<ul style="list-style-type: none">● Plesk Web Host Edition license● Smart Updates for 30 WordPress instances● SEO Toolkit Personal license● Backup to Cloud Pro● Revisium Anti-Virus● Boldgrid & Speed Kit - one domain each	<ul style="list-style-type: none">● Plesk Web Host Edition license● Plesk Premium Email - powered by Kolab for 10 users● Smart Updates for 10 WordPress instances● SEO Toolkit Personal license● Acronis Cloud Backup● Backup to Cloud Pro● Revisium Anti-Virus● Kaspersky Mail Anti Virus

Plesk Onyx Licensing on Hyperscalers

You can buy Plesk as a software license from our [pricing page](#). And additionally, you can also find Plesk offered on these major hyperscale cloud providers:

1. Amazon Web Services (AWS)
2. Vultr
3. Google Cloud Engine
4. Aliyun or Microsoft Azure Marketplaces
5. Alibaba Cloud
6. Digital Ocean
7. OVH

In all cases, you have two options to combine Plesk with a pre-installed, ready-to-use server:

1) Hourly licenses:

You buy Plesk in combination with any hyperscaler server available on AWS or Azure, where the **license is built into the server image** itself. Available in options as small as one hour.

2) BYOL (Bring your own license):

The server image **doesn't include a license for Plesk itself** once installed. That lets you use any Plesk license you may have purchased elsewhere or in our [Plesk store](#).

Note: No difference for either in price compared to our retail pricing, unless you buy servers with more than 4 CPUs. For such servers, additional license charges may apply.

Extra Features, Feature Packs and Extensions

We're now way past a one-size-fits all approach because disk space and manageability, amongst many other factors, are getting heavier and more complex by the day. We believe in a future-proof solution with a broad feature set delivering what customers want and need - today and later on.

That's why Plesk Onyx gives you a lightweight core and layers of features and goodies on top of your standard control panel. Transforming it into a cloud-ready platform that addresses multiple use case scenarios.

It also comes with a growing toolbox for your disposal: **The Plesk Extensions Catalog**. An ecosystem that we can split into three major categories:

1. Additional Plesk features

Optional add-ons you can purchase, including extra language packs or premium options like cGroups.

2. Feature packs

It may be worth going for a bundle of extensions rather than singles since they have one discounted price per pack. Making it easy for you to do business with us.

3. Free extensions

Some previous Plesk features have been shifted from the core to our catalog, waiting for you to install at no extra cost. Go have a field day and start customizing your Plesk.

4. Commercial extensions

If you plan to resell Plesk, this is your chance to tailor a solution for your customer/s, stand out from the crowd, add value to your IaaS offerings, and generate additional revenues.

Whether you want to add a tool for e-Commerce or enhanced security, all you need to do is pick and choose from the Plesk Extensions Catalog

Note:

Most of these features and extensions (if not free), are also licensed per server. With some exceptions offering per server licenses with additional packs inside. Like a number of domains or mailboxes, or even pay as you grow across multiple servers.

Available Plesk Feature Packs

Extension	Features	Category	Monthly Price
<p>Power Pack</p> 	<ul style="list-style-type: none"> • KAV Kaspersky Antivirus (5 Mailboxes) • Tomcat • MSSQL (Windows) • PostgreSQL (Linux) • Web Presence Builder (10 sites) <p>NEW:</p> <ul style="list-style-type: none"> • Docker Remote support (\$5 value) • DNSSEC • WordPress Toolkit (\$5 value) • Smarter Mail Remote Control (Windows only) 	Our new Power Pack 2.0	<p>Dedicated - \$14.99</p> <p>VPS - \$6.25</p>
