Introduction

This licensing guide provides an in-depth overview of the Plesk licensing model, the Plesk Partner Program, Plesk Special Editions, Plesk Extensions and Feature Packs. The Plesk Partner pricing and licensing structure is standardized for all customers worldwide and includes multiple Tier discount levels.

This structure defines the price for each license based on the different Plesk Editions available, each one with a different feature set and targeted to a specific audience. Additionally, Partners get access to all our extensions. Extensions developed in-house (called genuine extensions) also include multiple Tier discount levels. Third-party extensions include one fixed discount across all Partner Tier levels. Under the Plesk Partner Program, only monthly lease licenses are available.

Who is this document for?

This guide is for any potential, new and existing direct Plesk Partner and official Distributor, wanting to learn more about Plesk licensing structure, Partner Tier discount levels, and Plesk Partner Program.

For any company interested in partnering with Plesk, please contact our Partner Success team to get more information about our Partner Program and complete pricing information.

Benefits - The power to scale and grow your business

Scale and grow your hosting business with Plesk. Manage your customers and servers regardless of your infrastructure setup, customize your service plans to up- and cross-sell products and services, and scale your business and revenues.

Scale your Shared Hosting business from 1 website to 100s or 1000s across multiple servers. Plesk is also the most complete hosting control panel solution for high performance VPS and Dedicated Hosting. Respond to the industry’s fast evolution while keeping admin cost and trouble down.
Plesk Partner Program

The Plesk Partner Program is our way of helping clients extend their business as far as they can go. We show partners how to collect additional revenues, whatever service they provide: Cloud, hosting, admin, web or app development, and design.

</tr>
</tbody>
</table>

To start as a Plesk Partner, we require a minimum commitment of $250 per month in any leased Plesk product. This includes Plesk licenses and also all our extensions. Our team is actively working with all our Partners to help them bundle Plesk to their hosting services in the right way ensuring they all reach the minimum commitment in a short timeframe.

Applicable terms and conditions, as well as most recent pricing of the above described are available in signed contracts, as well as on plesk.com. All pricing described above is for reference only and may change. The latest pricing is always available on www.plesk.com or in signed Partner Agreements.
Partner Central

Performance is key so we created Partner Central just for you. Partner Central is our license management interface for buying, tracking and managing Plesk licenses.

What can you do here?

- Buy licenses for various software products
- Manage licenses, including retrieving, activating, binding to an IP address, upgrading, cloning, and terminating
- View statistics on your Plesk licenses
- Search licenses and view license information
- Specify configuration settings for several Plesk servers at once
- Manage Partner Central users
- Work with multiple customers
- View and download reports on your licenses

Read our guide to get started with this powerful tool.

Partner Central API

You can also connect via API to automate your license processing and improve your customer’s buying experience. Our Partner API allows easy and straightforward integration of our partners’ business automation systems with Plesk’s licensing system to purchase and resell licenses for Plesk and third-party products.

We want to develop Partner Central even more and keep adding useful features. So, missing anything? Let us know.

Applicable terms and conditions, as well as most recent pricing of the above described are available in signed contracts, as well as on plesk.com. All pricing described above is for reference only and may change. The latest pricing is always available on www.plesk.com or in signed Partner Agreements.
**Partner Resource Library**

As a Partner, you get access to the Partner Resource Library including the latest and greatest media: brochures, graphics, branding guidelines, logos and other important links and resources. This page provides you with a broad collection of core materials, go-to-market collaterals and additional graphic assets which have been specifically created to simplify your life and take your business to the next level.

**Plesk University**

Partners sell what they know. Plesk University includes free training and certification courses to guide you from being a novice to becoming an expert and help you get most out of key features of Plesk. Help your customer service and support teams to deliver excellent services, avoid common mistakes and increase customer retention. Get certified at no cost and let your revenues reach new heights.

**Plesk Partner Directory**

Gain exposure by getting listed on our Partner Directory. The directory is primarily designed for end users who are seeking hosting solutions powered by Plesk. As a Partner, you can get listed and gain exposure to thousands of visitors. You will get a landing page to display and promote your offers, and share your whitepapers, videos and other content to potential customers.
Plesk Licensing Model

Plesk licenses are available as subscription/lease, in the following license configurations, for virtual (also known as virtual private servers or VPS) and dedicated (also known as physical servers) servers:

- **Plesk Web Admin Edition**
  For managing up to 10 domains. For basic management of simple websites, includes Plesk WordPress Toolkit Lite.

- **Plesk Web Pro Edition**
  For managing up to 30 domains. It also includes full-featured Plesk WordPress Toolkit Pro.

- **Plesk Web Host Edition**
  Unlimited domains management, with reseller accounts management and Plesk WordPress Toolkit Pro.

For Partners, licenses are available on a monthly recurring basis. Apart from the pure core options, Plesk licenses can also be bought in discounted bundles with the Special Editions, as well as assorted with self-chosen extensions.

For partners with legacy perpetual (purchased) licenses, please refer to the following article about Software Update Service (SUS) and how to renew it.

Plesk Billing Policy for Partners

Licenses can be terminated any time - or they renew automatically through the Plesk licensing servers as follows:

- We charge for all licenses that were active in the previous calendar month
- These licenses may be used up until the end of the month

However a license needs a renewal event to trigger billing. For example:

- License created on 15th Jan => reported and billed for January
- License renewed on 15th Feb => reported and billed for February
- License terminated before 15th Mar (but potentially active until 14th Mar) => not reported and not billed for March

Billing also depends on # of days after creation:

- If the license was created during the month and was active for more than 3 days, then it will be reported and billed for that month even if terminated before month end

Applicable terms and conditions, as well as most recent pricing of the above described are available in signed contracts, as well as on plesk.com. All pricing described above is for reference only and may change. The latest pricing is always available on www.plesk.com or in signed Partner Agreements.
## Plesk Licenses, Editions and Standard Features

All three editions of our server-based licenses present several core features:

### Plesk Web Admin Edition
For Web & IT Admins who manage sites for an employer, business, or themselves. If your customer needs simple site and domain management without the service provider overheads, like managing customers, resellers or subscriptions - then this is the perfect choice.

### Plesk Web Pro Edition
For Web Professionals who design, develop, and deploy sites and web apps. If your customer needs a simple way to manage customers’ sites and apps, including use of WordPress as a CMS platform in a fully-managed model for his customers.

### Plesk Web Host Edition
For Agencies or Web Hosters with all the hosting features they need. Allow customers to use shared accounts in almost any configuration wanted. Secure WordPress and domain management tools too. This edition also offers advanced reseller management.

### Here’s a full breakdown of each edition’s available features:

<table>
<thead>
<tr>
<th>Core Features</th>
<th>Security Features</th>
</tr>
</thead>
<tbody>
<tr>
<td>10 domains</td>
<td>30 domains</td>

</tr>
</tbody>
</table>

Applicable terms and conditions, as well as most recent pricing of the above described are available in signed contracts, as well as on plesk.com. All pricing described above is for reference only and may change. The latest pricing is always available on www.plesk.com or in signed Partner Agreements.
There are two special editions to meet the needs of WordPress aficionados and businesses operating on the Plesk environment. Each is a bundle of useful extensions packed in one Plesk Edition with a specific offering.

**Plesk WordPress Edition**
For WordPress Users and Agencies. This bundle includes the Plesk Web Host Edition combined with extensions specifically-designed to support WordPress work.

- Plesk Web Host Edition license
- Smart Updates for 30 WordPress websites
- SEO Toolkit Personal license
- Backup to Cloud Pro
- ImunifyAV Anti-Virus
- Boldgrid & Speed Kit - one domain each

**Plesk Business & Collaboration Edition**
For SMB Owners and IT Admins. This bundle includes the Plesk Web Host Edition and necessary extensions and tools for all business and communication needs.

- Plesk Web Host Edition license
- Plesk Premium Email - powered by Kolab for 30 users
- Acronis Backup (100 GB)
- SEO Toolkit Personal
- Backup to Cloud Pro
- ImunifyAV
- Smart Updates (10 Domains)
- Plesk Email Security Pro

*Partners who would like to create these offerings with a different Plesk Edition license (Web Pro or Web Admin), can use the corresponding discounted bundle of extensions for each use case, available as feature packs: WordPress Pack and Business & Collaboration Pack - please refer to the feature packs section for more information.*

All pricing described above is for reference only and may change. The latest pricing is always available on www.plesk.com or in signed Partner Agreements.
Extensions, Feature Packs and Extra Features

We’re now way past a one-size-fits-all approach because disk space and manageability, amongst many other factors, are getting more massive and more complicated by the day. We believe in a future-proof solution with a broad feature set delivering what customers want and need - today and later on.

That’s why Plesk provides a lightweight core and layers of features and goodies on top of the standard control panel transforming it into a cloud-ready platform that addresses multiple use case scenarios.

It also comes with a growing toolbox always at your disposal: The Plesk Extensions Catalog. An ecosystem that we can split into four major categories:

**Plesk Extensions**

Plesk’s extensions provide extra tools, features, and services to users. Their purpose is to enhance how users work and interact with servers and websites. In particular, they serve a useful role when dealing with specific website areas, such as SEO, Security, Email, WordPress, and more.

Plesk has over 130 extensions in the Plesk Extensions Catalog - available as Free, Freemium, and Paid licenses. No matter if developed by our own team or by independent service providers, the Plesk extensions included in the extension catalog are certified for compatibility and smooth integration with our platform’s capabilities.

Have a field day and start customizing your Plesk with a wide variety of tools at no additional cost. From security to communication, all major purposes are covered in this category.

**Free extensions**

Have a field day and start customizing your Plesk with a wide variety of tools at no additional cost. From security to communication, all major purposes are covered in this category.

**Commercial extensions**

If you plan to resell Plesk, this is your chance to tailor a solution for your customer/s, stand out from the crowd, add value to your IaaS offerings, and generate additional revenues.

Whether you want to add a tool for e-Commerce or enhanced security or anything else which might be necessary for your setup, all you need to do is pick and choose from the Plesk Extensions Catalog. Most of these features and extensions (if not free), are also licensed per server (with some exceptions offering per-server licenses with additional packs inside, like a number of domains or mailboxes, or even pay as you grow across multiple servers).
Feature packs

It may be worth going for a bundle of extensions rather than singles since they have one discounted price per pack, making it easy for you to do business with us.

Available Plesk Feature Packs

_Plesk Feature Packs_ are bundles of extensions available for a discount price in comparison with buying the extensions separately. Currently, available feature packs are:

- Plesk Power Pack
- Plesk Hosting Pack
- Plesk Developer Pack
- Plesk WordPress Pack
- Plesk Business and Collaboration Pack
- Plesk Server Security Pack

In addition to the Feature packs, Plesk Additional Language Packs are also available for purchase. You can find out more about each Feature Pack and what is included [here](#).

Additional Plesk features

Optional add-ons are available for purchase, including extra language packs, or premium options. Some previous Plesk features have been shifted from the core to our catalog, waiting for you to install at no extra cost.
Plesk Special Offers. Price Adjustment

Depending on seasonality or opportunities, Plesk may activate special offers for both core licenses, as well as licenses for extensions or bundles. All information about available offers will be delivered to Partners through dedicated mailings and their respective account managers.

The Plesk licensing model is a modern, stable one, and we do not have plans of further adjusting it in the near future. The pricing point has not changed significantly over the years, however Plesk might decide to perform periodical adjustments to mirror market evolution, as well as internal factors such as further development of the product core or adjoining features. When such is the case, we commit ourselves to communicating transparently, as well as to notifying the interested parties in due time.
Dedicated server - A dedicated server is one that is exclusively allocated to a single website. The server is dedicated to your site alone so that all resources are at its disposal. Its advantages are reliability and high resource availability, with the downside of being more expensive than the shared alternatives.

Plesk Extension - Plesk extensions are extra tools, features, and services to enhance the way you work or offer more services to your customers. Available as free, freemium, or paid, these can be installed directly from the in-product Plesk Extension Catalog. Before being included in the catalog, extensions are thoroughly tested for full compatibility with the Plesk core.

Plesk Feature Packs - Plesk Feature Packs are bundles of extensions available for a discount price in comparison with buying the extensions separately.

Plesk Special Editions - Plesk Special Editions are configurations of Plesk licenses with an assortment of features catering to the demands of a particular audience group.

SUS - Software Update Service (SUS) is the software maintenance program allowing customers to perform a major version upgrade to a newer version free of charge and get technical assistance for the supported Plesk versions for perpetual licenses' owners.

VPS - A virtual private server or VPS is a virtual machine sold as a service, with enough processing power to hold all of the files and information that go together to make up a website. VPS hosting uses virtual server technology, which places a number of virtual servers on to a single physical server. Each one is separated and can be rebooted independently of the rest.
